Passionate and self-taught developer, building responsive web applications with a focus on user experience. Skilled in JavaScript, React, and modern front-end tools. My journey in development is driven by curiosity, initiative, and a dedication to continuous learning.

Work Experience

Junior Software Engineer

Apr 2023 - Sep 2024

Service NSW - Customer Identity and Access Management | Sydney

Provided technical support for authentication issues, developed front-end features using React and Redux, improved accessibility, and optimized code. Reduced support ticket backlog by 60% and collaborated with teams to enhance MFA integration and authentication flows.

- Customer Support and Issue Resolution:
- Provided timely and effective technical support for customer identity and authentication issues via ServiceNow.
- Troubleshoot and resolved a wide range of authentication problems, including login failures, account creation / deletion issues, and account unblocking.
- Leveraged tools like Postman, Splunk, Auth0, and Salesforce to investigate and resolve customer inquiries.
- Key Achievement: Significantly reduced the backlog of support tickets by over 60%.
- Front-End Development and Testing:
- Contributed to the development of authentication-related front-end features, including Multi-Factor Authentication (MFA) and Account Recovery flows, using React, Redux, SCSS, and React Router.
- Conducted comprehensive testing of new features and functionalities using JEST and manual testing techniques.
- Collaboration: Worked closely with the Mobile team to ensure seamless MFA integration and functionality across various devices.
- Performed thorough mobile
- Accessibility and Code Improvement:
- Played a key role in improving the accessibility of the authentication login/signup flow, ensuring compliance with AA standards.
- Actively participated in code reviews and implemented optimizations to enhance code quality and maintainability.
